SUMMARY

Software Engineering undergraduate and QA Automation Intern in FinTech, focused on **AI-augmented test automation** — building frameworks that generate, self-heal and triage tests. Hands-on across API, UI, cross-browser, mobile and performance testing, with a security-first mindset, clean framework architecture and CI/CD.

TECHNICAL SKILLS

Test Automation: Playwright · Selenium · Cypress · Rest Assured · Appium · TestNG · JUnit · Cucumber (BDD)

API & Performance: API Testing · Postman · JMeter · Load Testing · JSON Schema · Contract Testing

Languages: Java · TypeScript · JavaScript · SQL

CI/CD & DevOps: GitHub Actions · GitLab · Docker · Maven · Git

AI-Augmented QA: Claude API · LLM Integration · Applitools Visual AI · Prompt Engineering · Self-Healing Tests

Backend: Spring Boot · Spring Security · REST APIs · Microservices · Hibernate/JPA

EXPERIENCE

Software QA Automation Intern — Epic Lanka

Dec 2025 – Present · Battaramulla

- Automate end-to-end FinTech flows (fund transfers, OTP, bill payments) with **Playwright + Cucumber (BDD)**.
- Build **Rest Assured / TestNG** API suites with data-driven, contract and negative/security paths.
- Design **JMeter** performance tests (load / stress / soak) wired into CI gates.
- Apply **AI-augmented workflows (Claude Code)** for test generation, self-healing and failure triage.
- Own the full QA lifecycle — test planning, strategy mind-maps, requirement analysis and defect management.

KEY PROJECTS

AI Visual Testing Framework — Playwright · Applitools Visual AI · Claude Vision

Visual regression suite that surfaces only meaningful diffs and auto-classifies each failure (regression/bug/flake); Allure + PDF reporting.

API Test Automation Framework — Java · Rest Assured · TestNG

18 end-to-end tests (auth, CRUD, security, contract); self-healing retry & token refresh; Extent + branded PDF reports; CI on push/PR.

Cross-Browser Testing + AI — Playwright · WebKit · Claude

One spec across Chrome/Edge/Firefox/Safari in parallel; autonomous agents generate, self-verify & self-heal; consistency-matrix PDF report.

Mobile QA Framework (Appium) — Java · Appium · Cucumber

BDD automation across Android & iOS with PAN/CVV/OTP/JWT masking and PCI-DSS traceability; no real PII.

API Performance Testing (JMeter) — JMeter · Claude Code

One parameterized plan driving load/stress/soak/baseline; AI reads the JTL and returns a PASS/FAIL verdict with root-cause notes.
